

Economy Aluminum Pallets

Low Cost Alternative

- For Use In:
- Warehouses
 - Automated storage retrieval systems (ASRS)
 - General industrial environments

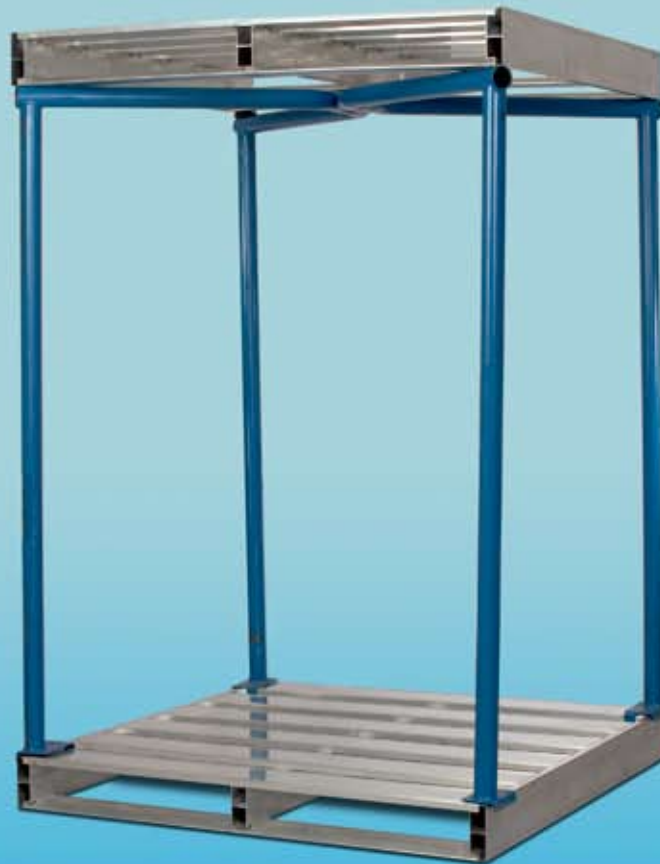

FEATURES:

- Heavy-duty aluminum construction
- Robotic welds
- Non-skid top & bottom surfaces
- 2-way or 4-way forklift access
- Designed for use with tier racks
- Standard designs available for loads up to 2,000 lbs.
- Custom designs available for loads in excess of 10,000 lbs.
- Anodized finishes available

BENEFITS:

- Lightweight — easily handled by one person
- Built to withstand heavy fork truck use
- Affordable leasing plans available
- High residual value
- 100% recyclable & made from recycled products

ADVANTAGES:

- Stackable
- Holds size and shape better than wood
- Wood-free, no risk of contamination from wood or wood-borne pests
- Easily cleaned
- Withstands extremes in temperature
- Fireproof — lower insurance costs
- No mechanical fasteners or parts
- Easily repaired
- Life cycle costs lower than wood or plastic pallets
